Originally published in 1987, this book presents a wide-ranging review of urban, regional, economic, and environmental planning in Canada. A comprehensive source of information on Canadian planning policies, it addresses the wide variations between Canadian provinces. While acknowledging similarities with programs and policies in the United States and Britain, the author documents the distinctively Canadian character of planning in Canada. Among the topics addressed in the book are: the agencies of planning; on the nature of urban plans; the instruments of planning; land policies; natural resources; regional planning at the federal level; regional planning and development in Ontario; regional planning in other provinces; environmental protection; planning and people; and reflections on the nature of planning in Canada. The author documents how governmental agencies handle problems of population growth, urban development, exploitation of natural resources, regional disparities, and many other issues that fall within the scope of urban and regional planning. But he goes beyond this to address matters of politics, law, economics, social organization. The book is pragmatic, eclectic, interpretive, and critical. It is a valuable contribution to international literature on planning in its political context.

This book presents the proceedings of the IUPESM World Biomedical Engineering and Medical Physics, a tri-annual high-level policy meeting dedicated exclusively to

furthering the role of biomedical engineering and medical physics in medicine. The book offers papers about emerging issues related to the development and sustainability of the role and impact of medical physicists and biomedical engineers in medicine and healthcare. It provides a unique and important forum to secure a coordinated, multileveled global response to the need, demand and importance of creating and supporting strong academic and clinical teams of biomedical engineers and medical physicists for the benefit of human health.

This book provides an overall understanding of construction contracts, explaining a range of topics with in-depth examples, allowing engineers, site managers, architects, contractors, and other construction professionals in search of information on construction contracts to find it in one place. The volume further serves as a learning tool and a reference guide for students and instructors. Adopting a primarily Canadian perspective, the book provides references from two Standard Contract Documents CCDC (Canadian Construction Document Committee) and FIDIC (International Federation of Consulting Engineers) and briefly describes other major contract documents used within USA and UK construction industries.

Energy Efficiency (EE) has been recognized since the early 1970s as the most relevant mechanism to optimize the way we meet our energy needs. The rationale behind this book is to present where the Canadian EE sector stands today to all Canadian stakeholders and those interested around the world. The Canada Energy

Efficiency Outlook aims to outline the different environments that support EE development in our highly diversified provinces and territories, as well as at the national level, and consequently allow the reader to better understand the complexities involved. More globally, this book serves as an important reference for all interested parties on how Canada has variably innovated and developed mechanisms to achieve the goal of making this country more energy efficient.

Thinkers50 Management Thinker of 2015 Whitney Johnson has a goal: to help us identify and achieve our dreams. Her belief is that we can each achieve greater happiness when focusing both on our dreams and on other people in our lives. In this inspiring book, Johnson directs her attention to teaching women, in particular, a three-step model for personal advancement and happiness. She first encourages us to Dare to boldly step out, to consider disrupting life as we know it. Then she teaches us how to Dream, to give life to the many possibilities available, whether to start a business, run a marathon, or travel the world. She shows us how to "date" our dreams (no need to commit!) and how to make space for dreams. Finally, Whitney's model brings out the businesswoman in her; she teaches us to Do, to execute our dreams. She showcases the importance of sharing dreams with others to give them life, creating your own "dream team." Rich with real stories of women who have dared to dream, Dare, Dream, Do offers a practical framework for making remarkable things happen.

This timely book offers a unique interdisciplinary inquiry into the prospects of different political narratives on climate migration. It identifies the essential angles on climate migration – the humanitarian narrative, the migration narrative and the climate change narrative – and assesses their prospects. The author contends that although such arguments will influence global governance, they will not necessarily achieve what advocates hope for. He discusses how the weaknesses of the concept of “climate migration” are likely to be utilized in favour of repressive policies against migration or for the defence of industrial nations against perceived threats from the Third World.

Germes and governance brings together leading historians, practitioners and policy makers to consider the past, present and future of hospital infection control. Combining historical case-studies with practitioner experiences, this volume offers a new understanding of

the emergence of theories of germ transmission and containment and how these theories played out in real-world environments, networks and professional organisations. Exploring the historical context in which technologies like gloves were developed and popularised, as well as how relationships between communities and hospitals, doctors and nurses, and the emerging role of hospital bacteriologists have shaped infection control practices, the collection emphasises the diverse contexts in which ideas about germs, infection and safety circulated. The volume also addresses the historical neglect of the critical role of nurses in the development and success of infection control measures. Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

In *Cleaner, Greener, Healthier*, David R. Boyd sets out to remedy Canada's environmental health problems. He begins by assessing the environmental burden of disease, identifies its unequal distribution, and estimates the associated economic costs. He then compares Canada's environmental laws and policies with those in the US, Australia, and the EU, delivering a provocative diagnosis of the causes of Canada's second-rate standards. Finally, he prescribes legal remedies that will enable Canada to catch up with the world's environmental leaders while delivering substantial health and economic benefits.

This book looks at the changing dynamics and regional power play between China and South Asia. It explores crucial issues such as China–Pakistan Economic Corridor and the changing nature of China–India relations; China's trident approach in South Asia and its rising influence in the region; responses of small states to rising China; China's 21st-century belt and road initiative; China and India; China's rise and USA's security policy vis-à-vis India; Shanghai Cooperation Organization and Regional Security and Russia's 'pivot to the East' and its impact on the Asia-Pacific region. The volume brings together views of scholars from China, South Asia and beyond on different aspects of China and South Asia engagement, including regional politics, connectivity, infrastructure and development projects, power politics, economy, ideology and culture. The chapters offer insights into trends and challenges within China's economic and security environment as impacted by globalization, regional interests and demands of cooperation. They present critical,

Expanded from its previous edition to include ages 13 and 14, this book provides teachers and parents with a quick reference on important childhood developmental issues, explaining what children should be learning and doing in the classroom at each developmental stage. The book begins by discussing how developmental issues can affect administrative and classroom decisions in the areas of mixed age grouping, ability grouping, retention, food, exercise, the structure of the school day, and racial and cultural questions. Each of the 11 chapters, one for each year, includes a narrative description and charts outlining growth patterns, classroom implications, and appropriate curriculum. The charts allow readers to identify developmental "yardsticks" for a given age. These charts outline characteristic growth patterns (physical, social, language, and cognitive) as well as what to expect in the classroom regarding vision and fine motor ability, gross motor ability, cognitive growth, and social behavior. The curriculum charts summarize the

developmental continuum between ages 4 and 14, covering reading, writing, mathematics, and thematic units in social science, science, and current events. The book concludes with a list of over 100 favorite books for different ages, and resources for parents and teachers. (HTH)

Was ist die Grundlage einer soliden Finanzarchitektur? Wie lässt sich stetig wachsenden Steuern, Schulden und Mehrausgaben und der Fehlallokation von finanziellen Ressourcen entgegenwirken? Die Theorie der institutionellen Kongruenz gibt darauf eine klare Antwort: Die Kreise von Entscheidungsträgern, Nutznießern und Zahlern für eine Entscheidung müssen weitestgehend übereinstimmen. Dafür bedarf es einer konsequenten Zentralisierung oder Dezentralisierung von Entscheidungsgewalt und Verantwortung bei Steuern, Ausgaben und Schulden. Wie sich das in der Praxis umsetzen lässt zeigen dabei die Analyse verschiedener staatlicher und unterstaatlicher Gebietskörperschaften in der Euro-Zone, Deutschland, Frankreich, Kanada, den USA, der Schweiz sowie die Analyse von Staatsschuldenkrisen autonomer Schuldnerstaaten.

"This narrative of the first half of Augustine's life conjures the

intellectual and social milieu of the late Roman Empire with a Proustian relish for detail." --New York Times In Augustine, celebrated historian Robin Lane Fox follows Augustine of Hippo on his journey to the writing of his Confessions.

Unbaptized, Augustine indulged in a life of lust before finally confessing and converting. Lane Fox recounts Augustine's sexual sins, his time in an outlawed heretical sect, and his gradual return to spirituality. Magisterial and beautifully written, Augustine is the authoritative portrait of this colossal figure at his most thoughtful, vulnerable, and profound.

Measuring government effectiveness is essential to ensuring accountability, as is an informed public that is willing and able to hold elected officials and policy-makers accountable. There are various forms of measurement, including against prior experience or compared to some ideal. In Yardstick

Competition among Governments, Pierre Salmon argues that a more effective and insightful approach is to use common measures across a variety of countries, state, or other relevant political and economic districts. This facilitates and enables citizens comparing policy outputs in their own jurisdictions with those of others. An advantage of this approach is that it reduces information asymmetries between citizens and public officials, decreasing the costs of monitoring by the former of the latter -along the lines of principal-agent theory. These comparisons can have an effect on citizens' support to incumbents and, as a consequence, also on governments' decisions. By increasing transparency, comparisons by common yardsticks can decrease the influence of interest groups and increase the focus on broader concerns, whether economic growth or others.

Salmon takes up complicating factors such as federalism and other forms of multi-level governance, where responsibility can become difficult to disentangle and accountability a challenge. Salmon also highlights the importance of publics

with heterogeneous preferences, including variations in how voters interpret their roles, functions, or tasks. This results in the coexistence within the same electorate of different types of voting behavior, not all of them forward-looking. In turn, when incumbents face such heterogeneity, they can treat the response to their decisions as an aggregate non-strategic relation between comparative performance and expected electoral support. Combining theoretical, methodological, and empirical research, Salmon demonstrates how yardstick competition among governments, a consequence of the possibility that citizens look across borders, is a very significant, systemic dimension of governance both at the local and at the national levels.

This conference volume deals with the question of what the economic impact of a shift in federal taxation toward greater use of indirect taxes would be with respect to the rate of saving and investment, personal effort, the balance of payments, and the efficiency of resource use. A major focus therefore is on the economic growth and balance-of-payments aspects which have been most emphasized in recent proposals for substitution of a sales tax or a value-added tax for part of the existing income tax. Global supply chain integration is not only a rapidly growing feature of international trade, it is responsible for

Online Library 2015 Yardsticks For Costing Canadian Construction Cost Data

fundamentally changing trade policy at international and domestic levels. Given that final goods are produced with both domestic and foreign suppliers, Ka Zeng and Xiaojun Li argue that global supply chain integration pits firms and industries that are more heavily dependent on foreign supply chains against those that are less dependent on intermediate goods for domestic production. Hence, businesses whose supply chain would be disrupted as a result of increased trade barriers should lobby for preferential trade liberalization to maintain access to those foreign markets. Moreover, businesses whose products are used in the production of goods in foreign countries should also support preferential trade liberalization to compete with suppliers from other parts of the world. *Fragmenting Globalization* uses multiple methods, including time series, cross-sectional analysis of the pattern of Preferential Trade Alliance formation by existing World Trade Organization members, a firm-level survey, and case studies of the pattern of corporate support for regional trade liberalization in both China and the United States. Zeng and Li show that the growing fragmentation of global production, trade, and investment is altering trade policy away from the traditional divide between export-oriented and import-competing industries.

Water is a finite and non-substitutable resource. As the foundation of life, societies and economies, it carries multiple values and benefits. But unlike most other natural resources, it has proven extremely difficult to determine its true 'value'.

The 2021 edition of the United Nations World Water Development Report, titled "Valuing Water" assesses the current status of and challenges to the valuation of water across different sectors and perspectives and identifies ways in which valuation can be promoted as a tool to help improve its management and achieve global sustainable development.

La finance est en crise ; mais elle est indispensable à la vie des hommes en société. Cependant, il serait abusif de considérer "la finance" comme un tout homogène. En effet, loin de la finance conventionnelle qui fait la une de l'actualité, il existe une finance dite alternative qui tente de placer et de maintenir l'Homme au centre de son projet et à l'horizon de son ambition. Cet ouvrage, premier du genre, se propose de présenter sous forme d'études réalisées par des spécialistes du droit financier, les manifestations de cette finance alternative, les outils, instruments et techniques juridiques qui existent et qui permettent de concilier finance et humanisme. À travers l'analyse des critères de développement durable ou religieux appliqués à la finance, des monnaies alternatives, du microcrédit, de la notation extra-financière, du mutualisme et du coopératisme en finance, du crowdfunding, des fonds éthiques, du financement associatif, du financement alternatif de l'habitat ou du soutien des collectivités publiques aux entreprises, ce livre fait, en France comme en Espagne, au Royaume-Uni, en Grèce et au Canada, un tour d'horizon complet de ce segment du secteur financier souvent méconnu et qui offre néanmoins aux Hommes de réaliser leurs projets dans la perspective d'un mieux-être collectif. Pour rompre avec l'idée que la finance n'est que spéculation et

From the bestselling author of *Blink* and *The Tipping Point*, Malcolm Gladwell's *Outliers: The Story of Success* overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. *Outliers* will change the way you think about your own life story, and about what makes us all unique. 'Gladwell is not only a brilliant storyteller; he can see what those stories tell us, the lessons they contain' *Guardian* 'Malcolm Gladwell is a global phenomenon ... he has a genius for making everything he writes seem like an impossible adventure' *Observer* 'He is the best kind of writer - the kind who makes you feel like you're a genius, rather than he's a genius' *The Times*

the market economy have contributed to them. The New Edition of this seminal text examines issues of discrimination, health care, housing, income, and child welfare and considers the policies that strive to improve them. With a focus on how domestic social policies can be transformed to promote social justice for all groups, Jimenez et al. consider the impact of globalization in the United States while addressing developing concerns now emerging in the global village.

This edition offers true tales of these take-charge princesses plus dozens more in a fascinating read that's perfect for history buffs, feminists, and anyone seeking a different kind of bedtime story. You think you know her story. You've read the Brothers Grimm, you've watched the Disney cartoons, and you cheered as these virtuous women lived happily ever after. But real princesses didn't always get happy endings. Sure, plenty were graceful and benevolent leaders, but just as many were ruthless in their quest for power, and all of them had skeletons rattling in their majestic closets. Princess Stephanie von Hohenlohe was a Nazi spy. Empress Elisabeth of the Austro-Hungarian Empire slept wearing a mask of raw veal. Princess Olga of Kiev slaughtered her way to sainthood. And Princess Lakshmibai waged war on the battlefield with her toddler strapped to her back.

Nation states have long and successfully claimed to

be the proper and sovereign forum for determining a country's international economic policies.

Increasingly, however, supranational and non-governmental actors are moving to the front of the stage. New forms of multilateral and global policy-making have emerged, including states and national administrations, key international organizations, international conferences, multinational enterprises, and a wide range of transnational pressure groups and NGOs that all claim their share in exercising power and influence on international and domestic policy-making. In honour of Professor Mitsuo Matsushita's intellectual contributions to the field of international economic law, this volume reflects on the current state and the future of international economic law. The book addresses a broad spectrum of themes in contemporary international economic regulations and focuses specifically on the significant areas of Professor Matsushita's scholarship, including the rise of the soft-law mechanism in international economic regulation, the role of the WTO and dispute settlement, and specific areas such as competition, subsidies, anti-dumping, intellectual property, and natural resources. Part one of the volume provides a comprehensive and critical analysis of the rule-based international dispute settlement mechanisms; Part two investigates the normative influences to and from WTO law; and Part three focuses on policy and law-making issues.

This book discusses various transport sustainability issues from the perspective of developing countries, exploring key issues, problems and potential solutions for improving transport sustainability in China. It first reviews the current transport sustainability baselines in the three key dimensions of environmental, economic and social sustainability, via an international comparison encompassing both developed and developing countries in different world regions. Then, with a time frame up to 2030, the study groups 100 major Chinese cities according to their baseline conditions, projected population and economic growth, and common sustainability challenges in passenger transport. A systematic attempt is made to discuss the characteristics, strengths and weaknesses of various emerging sustainable transport strategies, including the metro systems, bus rapid transit, light rail, bicycles (and e-bicycles), electric vehicles and walking. Based on the different city clusters identified, the study then explores the opportunities and constraints of introducing a range of emerging sustainable transport strategies through both statistical analysis and detailed fieldwork. Future directions and challenges are identified based on official documents, onsite observations and interviews with local people. The study concludes with thoughts on sustainable transport in smart cities, the importance of governance, local participation, internal and

external city movements, and towards a holistic sustainable transport plan. Unsustainable Transport and Transition in China will be of great interest to scholars interested in carbon emissions, climate change, environmental policy, planning, road safety, sustainability, transportation and urban studies, and is relevant to China and other developing countries. Become an informed, passionate citizen who demands honesty and integrity from our leaders or suffer the consequences of our own ignorance and apathy. In this updated and expanded New York Times bestselling nonpartisan book, Andy Andrews urges you to believe that seeking and discerning the truth really, really matters and that believing lies is the most dangerous thing you can do. You'll be challenged to become a more "careful student" of the past, seeking accurate, factual accounts of events and decisions that illuminate choices you face now. By considering how the Nazi German regime was able to carry out over eleven million institutional killings between 1933 and 1945, Andrews advocates for an informed population that demands honesty and integrity from its leaders and from each other. He includes several key documents written by our Founding Fathers as examples of America's core principles that present and future leadership should live up to and embrace. We can no longer measure a leader's worth by the yardsticks provided by the left or the right. Instead, we must use an unchanging standard: the pure, unvarnished truth. in price setting and how pricing has been used to attain better coverage, quality, financial protection, and health outcomes. It builds on newly commissioned case studies and lessons learned in calculating prices, negotiating with providers, and monitoring changes. Recognising that no single model is applicable to all settings, the study aimed to generate best practices and identify areas for future research, particularly in low- and middle-income settings. The report and the case studies were jointly developed by the OECD and the WHO Centre for Health Development in Kobe (Japan).

We feel uncertain and exposed. We feel vulnerable. Most of us try to fight those feelings - or feel guilt for feeling them in the first place. In a powerful new vision Dr Brené Brown challenges everything we think we know about vulnerability, and dispels the widely accepted myth that it's a weakness. She argues that, in truth, vulnerability is strength and when we shut ourselves off from vulnerability - from revealing our true selves - we distance ourselves from the experiences that bring purpose and meaning to our lives.
