Law in Northern Ireland is the essential textbook for all students of Northern Ireland's legal system. Changes to this new edition – some of them substantial – have been made to every section, taking full account of five years of developments. The book explores the evolution of law-making in Northern Ireland before going on to explain the relevant constitutional arrangements, how to identify and interpret applicable sources of law, and what are the fundamental rules and principles of public law, criminal law and private law, highlighting where appropriate what may be unusual about them. It contextualises the myriad of legal institutions operating in the jurisdiction, sets out how criminal and civil proceedings work in practice and provides useful information on how people become lawyers, what lawyers actually do once they become qualified and how

the legal system is funded. The appendices set out some sample sources of law so that readers can familiarise themselves with what is involved in handling legal documents. The language throughout is accessible and there are Tables of Cases and Legislation, as well as a comprehensive index.

There is an urgent need to better understand the legal issues pertaining to alternative dispute resolution (ADR), particularly in relation to mediation clauses. Despite the promotion of mediation by dispute resolution providers, policy makers, and judges, use of mediation remains low. In particular, problems arise when parties lack certainty regarding the legal effect of a mediation clause, and the potential uncertainty regarding the binding nature of agreements to pursue mediation is problematic and threatens the growth of ADR. This book closely examines the importance and complexity of mediation clauses in commercial contracts to remedy this persistent uncertainty. Using comparative law methods and detailed empirical research, it explores the creation of a comprehensive framework for the mediation clause. Providing valuable insight into the process of ADR and mediation, this book will be of interest to academics, law makers, law students, in-house counsel, lawyers, as well as parties interested in drafting enforceable mediation clauses.

This book explores the concept of beneficial ownership in equity law, the

domestic tax laws of the United Kingdom, Canada and the United States, as well as its varied and increasing uses in international tax law. By analysing the evolution of beneficiary rights in equity and the use of beneficial ownership wording in tax law, the book draws a roadmap for dealing with beneficial ownership in both national and international tax law. This approach highlights those common misconceptions that can be avoided by understanding the origins of the concept and its engagement with equity, as well as the differences with tax law. However, the book does not limit itself to dealing with theoretical discussion, but also offers an instructive and detailed practical case study. Offering both academic commentary and a practitioner focus, the book will be of the utmost interest to scholars and practitioners from common and civil law countries dealing with tax and estate law, particularly given beneficial ownership's increasing relevance.

This textbook is written in an informal and engaging manner with an emphasis on explaining the key topics covered in EU courses with clarity. End of chapter questions encourage students to test and reinforce their own learning. consideration is whether the conduct of undertakings has the effect of restricting competition or not. Such an 'objective' approach to antitrust enforcement leaves little room for subjective elements like intentions. But what happens when economic analysis reaches its limits? In this signal contribution, the author invokes the criminal law concept of mens rea, the idea of the 'guilty mind', thoroughly evaluating the normative cogency of mens rea evidence in the determination of antitrust infringements. Delving deep into the case law, the author views the subject from the standpoint of a confluence of various areas of law, including: the role of mens rea in the criminal law in France, Germany, and England and Wales; the different types of mens rea (e.g., intent, recklessness, negligence); mens rea in a corporate context; mens rea evidence in United States antitrust law; the notion of the 'meeting of minds' in Article 101 TFEU; relevance of intentions in the determination of the object of an agreement or concerted practice; relevance of intentions in the determination of abuse of a dominant position; and the role of mens rea in the determination of fines for antitrust breaches. The author also examines arguments both for and against the use of mens rea evidence in determining whether an antitrust infringement took place and how it should be punished. This is the first full-length assessment of what role mens rea evidence actually plays and should play in competition law even as the tools for antitrust analysis are meant to become increasingly objective. As a thoroughly researched and systematically presented commentary and analysis of the current status of the use of

explores the role of the European Commission, the possibilities for private law enforcement, and the responsibilities of member state national authorities. Key legal developments that have occurred since the first edition have been incorporated, including new statutory developments and case law. Particular attention is paid to the impact of the 2007 Lisbon Treaty on foundational EU treaty provisions enabling the European Commission to take legal action against EU member states infringing Union environmental law, the establishment of a new legal architecture at Union level on the topic of environmental criminal policy, as well as increased EU legislative intervention in the area of environmental inspections. The impact of the 1998 Århus Convention on EU environmental law enforcement is also addressed in detail, including the influence of recommendations of the Århus Convention's Compliance Committee.

This book addresses key challenges and conflicts arising in extractive industries (mining, oil drilling) concerning the human rights of workers, their families, local communities and other stakeholders. Further, it analyses various instruments that have sought to mitigate human rights violations by defining transparency-related obligations and participation rights. These include the Extractive Industries Transparency Initiative (EITI), disclosure requirements, and free, prior and informed consent (FPIC). The book critically assesses these instruments, demonstrating that, in some cases, they produce unwanted effects. Furthermore, it highlights the importance of resistance to extractive industry projects as a response to human rights violations, and discusses how transparency, participation and resistance are interconnected.
