Gus easily finds the first bone, but for the second Gus seems to have lost the scent, and heads confidently to a part of the floor where Jazz is sure no bones are hidden—at least not any that she's put there. But Gus is a professional, and sure enough, behind a door that shouldn't have been opened in decades, is a human skeleton. Jazz recognizes the skeleton as Bernadette Quinn, an ex-teacher at the school who'd never returned after one Christmas break, though letters and postcards from her had seemed to indicate there was no cause for worry. But now it seems Bernadette never left the school at all, and her hiding place makes it clear: this was murder. Bernadette's strident personality means there are a plethora of suspects inside the school and out of it, and as Jazz gets closer to the truth she can't help but wonder if someone might be dogging her footsteps . . .

A heartwarming dog story like no other: Tuesday, a lovable golden retriever, changes a former soldier's life forever. A highly decorated captain in the U.S. Army, Luis Montalván never backed down from a challenge during his two tours of duty in Iraq. After returning home from combat, however, his physical wounds and crippling post-traumatic stress disorder began to take their toll. He

wondered if he would ever recover. Then Luis met Tuesday, a sensitive golden retriever trained to assist the disabled. Tuesday had lived among prisoners and at a home for troubled boys, and he found it difficult to trust in or connect with a human being--until Luis. Until Tuesday is the story of how two wounded warriors, who had given so much and suffered the consequences, found salvation in each other. It is a story about war and peace, injury and recovery, psychological wounds and spiritual restoration. But more than that, it is a story about the love between a man and dog, and how, together, they healed each other's souls.

Offering a unique perspective on dog training, a former Navy SEAL and trainer of military working dogs discusses the science behind gaining a companion dog's trust and achieving desired levels of canine obedience. For more than thirty years the Monks of New Skete have been among America's most trusted authorities on dog training, canine behavior, and the animal/human bond. In their two now-classic bestsellers, *How to be Your Dog's Best Friend* and *The Art of Raising a Puppy*, the Monks draw on their experience as long-time breeders of German shepherds and as trainers of dogs of all breeds to provide--brilliantly distilled--the indispensable information and advice that every dog owner needs. This new edition of *The Art of Raising a Puppy* features new photographs throughout, along with updated chapters on play, crating, adopting dogs from shelters and rescue organizations, raising dogs in an urban environment, and the latest developments in canine health and canine behavioral theory.

A brand-new training regimen—off-leash in 30 days!—from the pack who brought you *The Art of Raising a Puppy*. The Monks of New Skete, longtime breeders of German shepherds and established dog trainers of all breeds, have developed a new training technique. A decade in the making, this program represents a leap into the future, using cutting-edge technology and a game-changing tool: the remote electronic collar. *The Art of Training Your Dog* presents their compassionate and efficient system for the first time, with background and advice on choosing the right collar. Employing a method designed by trainer Marc Goldberg, readers integrate the e-collar gradually, laying the foundation for good behavior with intentional and purposeful walks. Using very low stimulation at just the right time focuses a dog's attention for effortless learning moments that tie into a dog's natural pack instincts and help strengthen the bond between dog and human. In no time, readers will see their pups master commands like "sit," "stay," and "place"; stop troublesome behaviors; and run safely off-leash with consistent recall.

Presents a commonsense guide to understanding canine behavior, explaining how to use a dog's natural pack instincts to help fix behavioral issues and emphasizing the importance of exercise, discipline, and affection in a dog's life.

Describes how the author adopted a wild dog by installing a dog door so that the dog could live both inside and outside, in a study of human-dog partnership, and animal consciousness and behavior.
