This book offers a plurality of perspectives on the historical origins of logicism and on contemporary developments of logicist insights in philosophy of mathematics. It uniquely provides up-to-date research and novel interpretations on a variety of intertwined themes and historical figures related to different versions of logicism. The essays, written by prominent scholars, are divided into three thematic sections. The first section focuses on major authors like Frege, Dedekind, and Russell, providing a historical and theoretical exploration of such figures in the philosophical and mathematical milieu in which logicist views were first expounded. Section II sheds new light on the interconnections between these founding figures and a number of influential other traditions, represented by authors like Hilbert, Husserl, and Peano, as well as on the reconsideration of logicism by Carnap and the logical empiricists. Finally, the third section assesses the legacy of such authors and of logicist themes for contemporary philosophy of mathematics, offering new perspectives on highly debated topics--neo-logicism and its extension to accounts of ordinal numbers and set-theory, the comparison between neo-Fregean and neo-Dedekindian varieties of logicism, and the relation between logicist foundational issues and empirical research on numerical cognition--which define the prospects of logicism in the years to come. This book represents a comprehensive

account of the development of logicism and its contemporary relevance for the logico-philosophical foundations of mathematics. It will be of interest to graduate students and researchers working in philosophy of mathematics, philosophy of logic, and the history of analytic philosophy.

We've Got Words: A High School Student's Guide To The Parts of Speech & Public Speaking is a practical learner's guide to the 8 Parts of Speech and Public Speaking, providing students with a short and concise manual to understanding the basic grammatical elements of reading and writing sentences. This workbook is the 6th in the series. It is designed for grades 9-12. The scope of this workbook covers Public Speaking and the 8 Parts of Speech using lyrics in Spoken Word and Rap as instructional examples for all 8 parts of speech. This book is based on a classroom assignment in an AP class at Jackson High School in 2013-14. Logan Taylor accepted the challenge and wrote a Lyrical Dissertation titled *We've Got Words*. In this rap Logan systematically identified the parts of speech while expositing their meaning and usage. Based on Logan's Rap, this workbook was created to help students understand English Grammar and thereby be prepared to read and write at Proficiency grade level.

The focus of this book is to bring clarity and understanding to the ministry of the teacher. This information will help individuals to recognize the operation of this gift in their lives and in the lives of others. It is our hope that believers will develop a greater respect and appreciation for the teaching office and gift.

NATIONAL BESTSELLER • PEN/HEMINGWAY AWARD WINNER • One of The New York Times 10 Best Books of the Year • A wondrous and shattering novel that follows twelve characters from Native communities: all traveling to the Big Oakland Powwow, all connected to one another in ways they may not yet realize. Among them is Jacquie Red Feather, newly sober and trying to make it back to the family she left behind. Dene Oxendene, pulling his life together after his uncle's death and working at the powwow to honor his memory. Fourteen-year-old Orvil, coming to perform traditional dance for the very first time. Together, this chorus of voices tells of the plight of the urban Native American—grappling with a complex and painful history, with an inheritance of beauty and spirituality, with communion and sacrifice and heroism. Hailed as an instant classic, *There There* is at once poignant and unflinching, utterly contemporary and truly unforgettable. Now in a fourth edition, *Contemporary Topics* expands on its highly respected approach to developing academic listening and study skills. Organized around realistic college lectures, the text guides learners through carefully sequenced activities in skills such as note-taking, focusing attention, intensive listening, and vocabulary building. It also helps students evaluate their interests and explore possible career paths. New to This Edition New subject areas, presented as one-on-one academic lectures, emphasize professional applications such as software engineering, multimedia design, information technology, urban planning, and social psychology. each unit let students know the goals of each unit and what their learning experience will be. New audio interviews with topic experts provide context for the upcoming unit lecture. Bottom-up listening and pronunciation exercises emphasize important principles and improve real-time perception. An oral presentation activity, supported by specific preparation and delivery strategies, concludes each unit and includes the opportunity for peer evaluation. Proficiency assessments composed of short academic audio lectures and multiple-choice exams simulate TOEFL-style test format for practice on high-stakes tests. New Essential Online Resources include audio, video, and teacher materials (assessments, teaching notes, answer keys, audioscripts, presentation points, and more). Other Highlights Corpus vocabulary drawn from the Academic Word List ensures that students are exposed to core academic vocabulary. Collaborative activities with presentation strategies and peer evaluations allow students to make connections and develop critical thinking skills. Unit comprehension tests assess students' grasp of key concepts presented in the unit lecture. Mapped to the Global Scale of English. This book introduces the interlocking disciplines of property and planning to economic theory and practice. Unlike any other available textbook, *The Economics of Property and Planning* skilfully introduces the reader to the interplay between property and planning using an economic lens. As resources become scarce, there is a growing need for students to understand the principles of economics in property and planning, especially given the

rapid social, environmental, technological, and political changes that are shaping places. The book begins with an outline of key economists and economic problems, then resources and scarcity, before examining macro- and microeconomic factors at play in property and planning. Furthermore, this book covers a variety of topics, including spatial and locational modelling, fiscal approaches to redistribution, regeneration and renewal, and transport and infrastructure financing. There is also a particular focus on contemporary issues such as climate change, environmental limits to economic growth, sustainability and resilience, and affordable housing. This book also introduces practical evaluation tools and appraisal, plus a look at property and planning with respect to macroeconomic objectives, policy, and new directions. With property and planning essential factors in economic thinking and doing, this book provides insight into what future places will look like in real terms and how they will be shaped by policy.

Targeted disciplines for this book include Economics, Planning, Property, Construction, Geography, Environmental Management, Sustainability, Housing, Built Environment, Land Economy, Urban Studies, Regional Studies, and Public Policy.

First released in the Spring of 1999, *How People Learn* has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on

actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do--with curricula, classroom settings, and teaching methods--to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. *How People Learn* examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

In today's rapidly changing legal landscape, becoming a digital lawyer is vital to success within the legal profession. This textbook provides an accessible and thorough introduction to digital lawyering, present and future, and a toolkit for gaining the key attributes and skills required to utilise technology within legal practice effectively. Digital technologies have already begun a radical transformation of the legal profession and the justice system. Digital Lawyering introduces students to all key topics, from the role of blockchain to the use of digital evidence in courtrooms, supported by contemporary case studies and integrated, interactive activities. The book considers specific forms of technology, such as Big Data, analytics and artificial intelligence, but also broader issues including regulation, privacy and ethics. It encourages students to explore the impact of digital lawyering upon professional identity, and to consider the emerging skills and competencies employers now require. Using this textbook will allow students to identify, discuss and reflect on emerging issues and trends within digital lawyering in a critical and informed manner, drawing on both its theoretical basis and accounts of its use in legal practice. Digital Lawyering is ideal for use as a main textbook on modules focused on technology and law, and as a supplementary textbook on modules covering lawyering and legal skills more generally.

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Our students study authentic texts and come to recognize these "patterns of power"--the essential grammar conventions that readers and writers require to make meaning. The first part of the book introduces a vibrant approach to grammar instruction and sets up what you need to immerse yourself in the Patterns of Power process, inviting students to experiment and play with language. The second part of the book offers over seventy practical, ready-to-use lessons, including: Extensive support materials Over 100 mentor sentences, curated for grades 1-5 Student work samples Tips and power notes to facilitate your own knowledge and learning Examples for application In Patterns of Power Jeff and Whitney suggest that taking just five minutes from your reading workshop and five minutes from your writing workshop to focus on how the conventions connect reading and writing will miraculously affect your students' understanding of how language works for readers and writers.

The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this "vital, necessary, and beautiful book" (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and "allows us to understand racism as a practice not restricted to 'bad people' (Claudia Rankine).

Referring to the defensive moves that white people make when challenged racially, white fragility is

characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.

Making Connections teaches an extensive range of reading skills and strategies in order to prepare students for college reading. The current series takes students from a low-intermediate to a low-advanced level of academic reading skill proficiency. In December 2015 two new levels - high beginning and advanced - will be added to the series. The series contains a strong focus on vocabulary-building, including teaching words from the Academic Word List. It emphasizes critical thinking and increased reading speed. The series has a unique unit structure. At the outset of each unit, students are presented with and practice key reading and vocabulary-building skills. As students read the texts following these sections, they apply these skills by completing exercises in boxes in the margins of the readings, so that students literally have to apply

The achievement of students of color continues to be disproportionately low at all levels of education. More than ever, Geneva Gay's foundational book on culturally responsive teaching is essential reading in addressing the needs of today's diverse student population. Combining insights from multicultural education theory and research with real-life classroom stories, Gay demonstrates that all students will perform better on multiple measures of achievement when teaching is filtered through their own cultural experiences. This bestselling text has been extensively revised to include expanded coverage of student ethnic groups: African and Latino Americans as well as Asian and Native Americans as well as new material on culturally diverse communication, addressing common myths about language diversity and the effects of "English Plus" instruction.
