The last decades have seen a lively interest in Roman verse satire, and this collection of essays introduces the reader to the best of modern critical writing on Persius and Juvenal. The eight articles on Persius range from detailed analyses of his fine technique to readings inspired by theoretical approaches such as New Historicism, Reader-Response Criticism, and Dialogics. The nine selections on Juvenal focus upon the pivotal question in modern Juvenalian criticism: how serious is the poet when he voices his appallingly misogynist, homophobic, and xenophobic moralism? The contributors challenge the straightforward equivalence of author and speaker in a variety of ways, and they also point up the technical aspects of Juvenal's art. Three papers have been newly translated for this volume, and all Latin quotations are also given in English. A specially written Introduction provides a useful conspectus of recent scholarship.

Sold into slavery, Hekat dreams of power. Fate leads her to the warlord Raklion, and she begins turning dreams into reality. For the nameless god of Mijak is with her, and it promises her the world. Far away, the King of Ethrea is dying. His daughter Princess Rhian is ready to rule, but if her enemies have their way the crown of Ethrea will never be worn by a woman. Dexterity Jones is a toymaker. To protect Rhian and his country, he must place his trust in an exile from Mijak. Yet, as Ethrea comes ever closer to civil war, a greater danger awaits. Hekat still desires the world ... and power is no longer a dream. This omnibus edition of THE GODSPEAKER TRILOGY includes Empress, The Riven Kingdom and The Hammer of God.

'A writer who seems to set the rule for the genre' - WATERSTONE'S BOOKS QUARTERLY 'Top-notch fantasy . . . a masterclass writer' - SFFWORLD In Ethrea, Rhian sits upon a precarious throne. Defiant noblemen who won't accept her rule threaten the stability of her kingdom, Zandakar, a man she thought was her friend, has been revealed as the son of a woman sworn to destroy her and her husband, King Alasdair, is increasingly unsure of her love. Rhian's most grave problem, however, lay outside the borders of her realm. The trading nations refuse to believe Mijak is a threat and promise reprisals if she dares to protect her realm. If she cannot unite the warring factions within her land, a move against Mijak might prove the end of her reign. Which is exactly what the empress of Mijak has planned. . . The third volume of Karen Miller's epic fantasy of power, politics and the rise and fall of empires . . . Books by Karen Miller: Kingmaker, Kingbreaker Series The Innocent Mage The Awakened Mage A Blight of Mages Godspeaker Empress of Mijak The Riven Kingdom Fisherman's Children The Prodigal Mage The Reluctant Mage Tarnished Crown The Falcon Throne Prince of Glass

The synthetic phonics approach is used in all primary schools in England. If you are a trainee or beginning primary school teacher, you need to demonstrate a confidence in the teaching of phonics to meet the Teachers' Standards and gain QTS. This is a practical, up-to-date guide to teaching children to read using synthetic phonics. It helps you to understand the theory behind phonics and how children's learning of reading can develop. It gives you practical teaching strategies and outlines how you can assess and diagnose reading problems. This second edition has been updated to include new chapters on the new Phonics Check in year 1 and overviews of popular phonics schemes used in England and Scotland.

Most conventional cryogenic refrigerators and liquefiers operate with pure fluids, the major exception being natural gas liquefiers that use mixed refrigerant processes. The fundamental aspects of mixed refrigerant processes, though very innovative, have not received the due attention in open literature in view of commercial interests. Hundreds of patents exist on different aspects of mixed refrigerant processes. However, it is difficult to piece together the existing information to choose an appropriate process and an optimum composition for a given application. The aim of the book is to teach (a.) the need for refrigerant mixtures, (b.) the type of mixtures that can be used for different refrigeration and liquefaction applications, (c.) the different processes that can be used and (d.) the methods to be adopted for choosing the components of a mixture and their concentration for different applications.

Published in association with the BACUP, this textbook provides the required knowledge for counselling skills qualifications. The book relates to the activity of counselling skills and addresses the context and roles in which these skills are used. Each chapter of the book contains information and practical activities which are designed to test knowledge. The book offers comprehensive coverage of the following areas: ? Ethics and processes, including the description of the difference between counselling skills and counselling. ? Life stages. ? Theoretical perspectives. ? Values, attitudes and beliefs. ? Listening skills. ? Settings. ? Bullying and harassment. ? Mentoring. The book is ideal for students on counseling skills courses and those using counseling skills in a variety of different environments.

Provides readers with a detailed understanding of the different facets of muscle physiology. Examines motoneuron and muscle structure and function. It is intended for those who need to know about skeletal muscle--from undergraduate and graduate students gaining advanced knowledge in kinesiology to physiotherapists, physiatrists, and other professionals whose work demands understanding of muscle form and function.

A unique approach to sensorless control and regulator design of electric drives Based on the author's vast industry experience and collaborative works with other industries, Control of Electric Machine Drive Systems is packed with tested, implemented, and verified ideas that engineers can apply to everyday problems in the field. Originally published in Korean as a textbook, this highly practical updated version features the latest information on the control of electric machines and apparatus, as well as a new chapter on sensorless control of AC machines, a topic not covered in any other publication. The book begins by explaining the features of the electric drive system and trends of development in related technologies, as well as the basic structure and operation principles of the electric machine. It also addresses steady state characteristics and control of the machines and the transformation of physical variables of AC machines using reference frame theory in order to provide a proper foundation for the material. The heart of the book reviews several control algorithms of electric machines and power converters, explaining active damping and how to regulate current, speed, and position in a feedback manner. Seung-Ki Sul introduces tricks to enhance the control performance of the electric machines, and the algorithm to detect the phase angle of an AC source and to control DC link voltages of power converters. Topics also covered are: Vector control Control algorithms for position/speed sensorless drive of AC machines Methods for identifying the

parameters of electric machines and power converters The matrix algebra to model a three-phase AC machine in d-q-n axes Every chapter features exercise problems drawn from actual industry experience. The book also includes more than 300 figures and offers access to an FTP site, which provides MATLAB programs for selected problems. The book's practicality and realworld relatability make it an invaluable resource for professionals and engineers involved in the research and development of electric machine drive business, industrial drive designers, and senior undergraduate and graduate students. To obtain instructor materials please send an email to [pressbooks@ieee.org](mailto:pressbooks@ieee.org) To visit this book's FTP site to download MATLAB codes, please click on this link: [ftp://ftp.wiley.com/public/sci\\_tech\\_med/electric\\_machine/](ftp://ftp.wiley.com/public/sci_tech_med/electric_machine/) MATLAB codes are also downloadable from Wiley Booksupport Site at <http://booksupport.wiley.com>

The Old Man at the Foot of the MountainITBMSoap Making Made Easy Ultimate Guide To Soap Making Including RecipesSoapmaking Homeade and Handcrafted for 2015Speedy Publishing LLC

Media expansion into the digital realm and the continuing segregation of users into niches has led to a proliferation of cultural products targeted to and consumed by women. Though often dismissed as frivolous or excessively emotional, feminized culture in reality offers compelling insights into the American experience of the early twenty-first century. Elana Levine brings together writings from feminist critics that chart the current terrain of feminized pop cultural production. Analyzing everything from Fifty Shades of Grey to Pinterest to pregnancy apps, contributors examine the economic, technological, representational, and experiential dimensions of products and phenomena that speak to, and about, the feminine. As these essays show, the imperative of productivity currently permeating feminized pop culture has created a generation of texts that speak as much to women's roles as public and private workers as to an impulse for fantasy or escape. Incisive and compelling, Cupcakes, Pinterest, and Ladyporn sheds new light on contemporary women's engagement with an array of media forms in the context of postfeminist culture and neoliberalism.

Provides the latest information on a wide range of topics, including animals, culture, geography, the environment, history, and science.

Soap making at home has many benefits both for adults and children. Basic soap making can teach you about chemistry processes like saponification and more. On top of that, the more familiar you get with the process, the more you can create soap that is designed especially for your needs. You will be able to create soaps with the scents that you love, that do not irritate sensitive skin and that even comes in the shapes that you prefer. Soap making is a great way to get the soap you want!

Water Is The Most Critical Resource For The Long-Term Sustainable Development Of The Middle East. This Book Will Be Of Direct Interest To Anyone Interested In The Management Of International Waters.

A creative journal designed by psychotherapist, Sue Patton Thoele, this book combines inspiration, courage and constancy with an interactive growth experience. The author mixes quotes from her books with lessons and exercises to guide the private words and thoughts of readers.

This book offers a comprehensive introduction to the subject of control engineering. Both continuous- and discrete-time control systems are treated, although the emphasis is on continuous-time systems. A chapter each is devoted to in-depth analysis of non-linear control systems, control system components, and optimal control theory. The book also introduces students to the modern concepts of neural fuzzy and adaptive learning systems.
