Con base en una amplia revision bibliografica, el documento presenta la forma como han sido estudiados, la respuesta resiliente y el fenomeno de acumulacion de deformaciones plasticas de materiales granulares que conforman estructuras de pavimentos flexibles. Se describen las ecuaciones matematicas mas utilizadas en el mundo para intentar predecir el complejo comportamiento elastoplastico que experimentan estos materiales bajo cargas similares a las que ocurren en un pavimento. En sintesis, el documento presenta un estado del conocimiento sobre el tema.

In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for

all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

The celebrated Hollywood icon comes fully to life in this complex portrait by noted film historian and master biographer Scott Eyman. Exploring Wayne's early life with a difficult mother and a feckless father, "Eyman gets at the details that the bean-counters and myth-spinners miss ... Wayne's intimates have told things here that they've never told anyone else" (Los Angeles Times). Eyman makes startling connections to Wayne's later days as an anti-Communist conservative, his stormy marriages to Latina women, and his notorious--and surprisingly long-lived--passionate affair with Marlene Dietrich.

PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for

which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is depend- ent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream- fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we dont deny that. In an untried loch it is necessary to have the

guidance of a good boatman but the same argument holds good as to stream-fishing...

A provocative meditation on the role of silence in Christian tradition by the New York Times bestselling author of *Christianity We live in a world dominated by noise*. Religion is, for many, a haven from the clamor of everyday life, allowing us to pause for silent contemplation. But as Diarmaid MacCulloch shows, there are many forms of religious silence, from contemplation and prayer to repression and evasion. In his latest work, MacCulloch considers Jesus's strategic use of silence in his confrontation with Pontius Pilate and traces the impact of the first mystics in Syria on monastic tradition. He discusses the complicated fate of silence in Protestant and evangelical tradition and confronts the more sinister institutional forms of silence. A groundbreaking book by one of our greatest historians, *Silence* challenges our fundamental views of spirituality and illuminates the deepest mysteries of faith.

"Judaism is one of the oldest religions in the world, and it has preserved its distinctive identity despite the extraordinarily diverse forms and beliefs it has embodied over the course of more than three millennia. A History of Judaism provides the first truly comprehensive look in one volume at how this great religion came to be, how it has evolved from one age to the next, and how its various strains, sects, and traditions have related to each other. In this magisterial and elegantly written book, Martin Goodman takes readers from Judaism's origins in the polytheistic world of the second and first millennia BCE to the temple cult at the time of Jesus. He tells the stories of the rabbis, mystics, and messiahs of the medieval and early modern periods and guides us through the many varieties of Judaism today. Goodman's compelling narrative spans the globe, from the Middle East, Europe, and America to North Africa, China, and India. He explains the institutions and ideas on which all forms of Judaism are based, and masterfully weaves together the different threads of doctrinal and philosophical debate that run throughout its history."--

The tragedy that occurred in the United States on September 11, 2001 brought enhanced emergency preparedness among first responders to the forefront of public awareness. Since those events — and despite significant progress made in many of the

areas previously deemed deficient — some response areas are still woefully inadequate. Cross-Training for First Responders highlights these weaknesses that, in many cases, still remain in the response community. The book presents concrete solutions that arm first responders with vital knowledge so that they are better prepared in the event of another major incident. Innovative training The author demonstrates that the best way responders can prepare for, react to, and mitigate an incident is to require them to train outside their traditional responsibilities — thereby developing an understanding of other first responder agencies' terms, methods, and operational procedures. Despite this enhanced situational training, communication gaps can occur during cross-response and across regions. The book explains the kind of training required to prevent a lack of situational awareness by those thrust into unfamiliar territory during crisis events or mass disasters. Other topics include ways to curtail the inherent tensions that arise between voluntary and career responders, how to turn conflicts between various responding agencies into collaboration, innovative training strategies, grant opportunities to pay for training and equipment, and the rising trend of on-line training courses. Testing readiness before an incident occurs Finally, the book covers mechanisms for testing first responders' ability to apply their new cross-training techniques, demonstrates how to plan and conduct a "tabletop" drill, and explains how to review the drill results to determine the areas in which participants are still deficient. By identifying problem areas and offering concrete solutions, this book enables first

responders to harness every possible advantage so that they are prepared and ready to confront the next crisis, no matter where it may strike.

Recognizing the importance of providing high-quality preschool education for helping to ensure children's future educational success, this document presents guidelines for what constitutes high-quality programming across a broad spectrum of curriculum and practice for California preschools, taking into account the state's move toward higher expectations for all students. The document is presented in three parts. Part 1 reviews the background and context of early childhood education, with a particular focus on recent developments in the field in California. Part 2 consists of guidelines for all the major areas of a high-quality preschool program, with the themes of special needs, cultural diversity, parent and family involvement, assessment, and professional development woven throughout the document. Part 3 presents a variety of resources for program implementation and improvement. Guidelines, examples, and vignettes in the document offer directions on the best practices for school professionals, drawing on research, the collective professional experience of an expert panel, and on visits to the sites of exemplary programs throughout California and other states. Nine appendices include guideline summaries, a continuum of teaching behaviors, and special needs legislation and services. (KB)

The author contends that for 250 years, roughly from the 1720s to the 1970s, the sociocultural system of Petén endured with remarkable continuity, not in spite of the

changes in the hinterland region but, to an important degree, because of them. *Landscapes of Power and Identity* is a groundbreaking comparative history of two colonies on the frontiers of the Spanish empire—the Sonora region of northwestern Mexico and the Chiquitos region of eastern Bolivia’s lowlands—from the late colonial period through the middle of the nineteenth century. An innovative combination of environmental and cultural history, this book reflects Cynthia Radding’s more than two decades of research on Mexico and Bolivia and her consideration of the relationships between human societies and the geographic landscapes they inhabit and create. At first glance, Sonora and Chiquitos are quite different: one a scrub-covered desert, the other a tropical rainforest of the greater Amazonian and Paraguayan river basins. Yet the regions are similar in many ways. Both were located far from the centers of colonial authority, organized into Jesuit missions and linked to the principal mining centers of New Spain and the Andes, and then absorbed into nation-states in the nineteenth century. In each area, the indigenous communities encountered European governors, missionaries, slave hunters, merchants, miners, and ranchers. Radding’s comparative approach illuminates what happened when similar institutions of imperial governance, commerce, and religion were planted in different physical and cultural environments. She draws on archival

documents, published reports by missionaries and travelers, and previous histories as well as ecological studies and ethnographies. She also considers cultural artifacts, including archaeological remains, architecture, liturgical music, and religious dances. Radding demonstrates how colonial encounters were conditioned by both the local landscape and cultural expectations; how the colonizers and colonized understood notions of territory and property; how religion formed the cultural practices and historical memories of the Sonoran and Chiquitano peoples; and how the conflict between the indigenous communities and the surrounding creole societies developed in new directions well into the nineteenth century.

This book examines the evolution of the phenomenon and explores the genesis of overtourism and the system dynamics underlining it. The 'overtourism' phenomenon is defined as the excessive growth of visitors leading to overcrowding and the consequential suffering of residents, due to temporary and often seasonal tourism peaks, that lead to permanent changes in lifestyles, amenities and well-being. Enormous tensions in overtourism affected destinations have driven the intensification of policy making and scholarly attention toward seeking antidotes to an issue that is considered paradoxical and problematic. Moving beyond the 'top 10 things you can do about overtourism', this book examines the evolution of the phenomenon and explores the genesis of

overtourism as well as the system dynamics underpinning it. With a rigorous scientific approach, the book uses systems-thinking and contemporary paradigms around sustainable development, resilience planning and degrowth; while considering global economic, socio-political, environmental discourses. Researchers, analysts, policy makers and industry stakeholders working within tourism as well as those within the private sector, community groups, civil society groups and NGOs will find this book an essential source of information.

"... innovative and important thinking about the various relations between feminist theory, queer theory, and lesbian theory, as well as the possibility that liberation can be mutual rather than mutually exclusive." —Lambda Book Report

When feminism meets queer theory, no introductions seem necessary. The two share common political interests—a concern for women's and gay and lesbian rights—and many of the same academic and intellectual roots. And yet, they can also seem like strangers, needing mediation, translation, clarification. This volume focuses on the encounters of feminist and queer theories, on the ways in which basic terms such as "male" and "female," "man" and "woman," "black," "white," "sex," "gender," and "sexuality" change meaning as they move from one body of theory to another. Along with essays by Judith Butler, Evelyn Hammonds, Bidy Martin, Kim Michasiw, Carole-Anne Tyler, and Elizabeth

Weed, there are interviews: Judith Butler engages Rosi Braidotti and Gayle Rubin in separate revealing discussions. And there are critical exchanges: Rosi Braidotti and Trevor Hope exchange comments on his reading of her work; and Teresa de Lauretis responds to Elizabeth Grosz's review of her recent book. Exploring the status of feminism in this "postfeminist" age, this sophisticated meditation on feminist thinking over the past three decades moves away from the all too common dependence on French theorists and male thinkers and instead builds on a wide-ranging body of feminist theory written by women. These writings address the question "Where are we going?" as well as "Where have we come from?" As evidenced in the essays compiled here, the multiplicity of directions available to this new feminism ranges from poststructuralist academic theory through cultural activism to re-readings of law, literature, and representation. Contributors include Mieke Bal, Lauren Berlant, Rosi Braidotti, Elisabeth Bronfen, Judith Butler, Rey Chow, Drucilla Cornell, Ann Cvetkovich, Jane Gallop, Beatrice Hanssen, Claire Kahane, Ranjana Khanna, Biddy Martin, Juliet Mitchell, Anita Haya Patterson, and Valerie Smith. *Feminist Consequences*, representing the forefront of international feminist thought, marks a new and long-desired stage of feminist criticism where women are themselves making theory rather than reacting to male production.

The book summarizes the history of biological control in Latin America and the Caribbean. Few publications provide historical detail and the records are, therefore, fragmented until now. By bringing information together in this book, we offer a more complete picture of important developments in biological control on this continent. There are a wealth of text, tables and references about the history of such projects, and which were successful and which failed. This will help plan future biocontrol projects. An overview is provided of the current situation in biological control for many Latin American and Caribbean countries, revealing an astonishing level of practical biological control applied in the region, making it the largest area under biological control worldwide. The final part describes new developments and speculates about the future of biological control in Latin America and the Caribbean.

"Eusebius of Caesarea's Ecclesiastical History remains the single most important source for the history of the first three centuries of Christianity and stands among the classics of Western literature. Eusebius's iconic story of the church's origins, endurance of persecution, and ultimate triumph, with its cast of martyrs, heretics, bishops, and emperors, has profoundly shaped the understanding of Christianity's past. This fresh new translation, which includes detailed introductory essays and explanatory notes, presents Eusebius's work in a way that is both accessible to new readers and thought provoking for specialists"--Provided by publisher.
