Since Gorbachev took office in 1985, every aspect of the Soviet past has been under scrutiny. Tens of millions of Soviet citizens are eagerly absorbing and debating the vast outpouring of novels, books and articles, and films and TV programmes, about their past. Much new information has appeared, often sensational, about how the Stalin regime worked and what it meant for top politicians, generals, intellectuals and ordinary citizens. Stalinists, Russian nationalists, democratic socialists and others are locked in bitter debate. Was the victory of Stalinism inevitable? Was there an alternative road to socialism? Even Lenin and his policies are now questioned. The Politburo itself is deeply divided about how far the debate should go and what conclusions should be drawn from it. The reconsideration about the past is part of the discussion about the way forward for Soviet society: how big should be the role of the market? How much freedom and democracy?

This book examines the role of the inspector within the context of a number of OECD member states and explores the ways in which the inspectors themselves interpret, implement and influence inspection practices and policy. Inspection policy can have various unintended consequences, some of which produce radical discrepancies between the policy intent and its implementation. A number of these discrepancies derive from the way in which the policy is articulated while others derive from the ways in which inspectors interpret and

operationalise this policy. This implementation is coloured and conditioned by several factors, including the evidence on which inspectors base their judgements; what counts as evidence in different policy contexts; what counts as valid knowledge in inspection processes; the qualities needed by inspectors working in differing policy contexts and the identities that they adopt in order to successfully carry out their work. The book provides a valuable contribution to our understanding of the politics and practices which colour and shape the legitimacy and operational execution of inspection policy. The work is unique in its focus on the inspectors' role within the implementation of the inspection process—an element often overlooked in the literature. It also includes two chapters co-written by inspectors, offering unique insights into their life worlds and identities.
