Sap For Utilities Roadmap For The Digital Utility

Maldives has no proven fossil fuel reserves, but it has abundant renewable energy sources such as solar, wind, and ocean (tidal, wave, and ocean thermal), and has the potential to produce green hydrogen fuel using renewable energy. The coronavirus pandemic has impaired Maldives' economy, severely affecting its tourism industry, which is one the country's main economic drivers. The country's recovery will largely depend on the rapid transformation and diversification of its economic activities. Renewable energy offers a promising alternative to fossil fuels as the country embarks on a transformation challenge. This Road Map serves as a guide for Maldives' energy transition—from being powered by costly and polluting fossil fuels to being powered by affordable and efficient renewable and cleaner energy sources.

Put machine learning to work in SAP S/4HANA! Get started by reviewing your available tools and implementation options. Then, learn how to set up services, train models, and manage applications.
