Many woodwind players come from a classical background which may not have taught you how to play by ear. While this can provide an excellent grounding in music, it doesn't teach you how to improvise, and often it's difficult for classically trained musicians to learn Jazz soloing. *Beginner Jazz Soloing For Saxophone & Clarinet* is the perfect guide to bridge the gap. Devised by Buster Birch (visiting jazz professor at Trinity Conservatoire), this book teaches a creative method for improvisation that's been road-tested at hundreds of workshops.

"Ben Britton has put together a comprehensive volume explaining the overtone series and how to practice with it. A must-have for serious students of the saxophone." - Charles Pillow, Assistant Professor of Jazz Saxophone, Eastman School of Music From the introduction: "One of the most efficient ways to improve saxophone sound or tone is through overtone practice. Just a minute or two of proper overtone practice immediately increases the clarity and richness of tone as well as increases your ability to maintain a great sound while playing technically difficult music. Regularly practicing overtones will lead to consistently achieving those ends and extending your range into

the altissimo register. Mastering overtones can result in a near four-octave range with a consistent and beautiful sound throughout." Improvisation is at the heart of Jazz, but knowing how to play stylistically correct in a large Jazz ensemble is also a necessity. Chops 3: The Sinta Quartet Method continues the mission of its 2 predecessors to modernize and update the fundamental areas of

saxophone performance and study. This volume focuses entirely on the chamber music fundamentals needed to have a successful saxophone quartet experience and to develop effective rehearsal strategies. Of course, the bulk of your time in rehearsal will be spent on repertoire; however, the addition of warm-ups and fundamentals to the start - and perhaps end - of each rehearsal will allow for greater efficiency in achieving a unified approach to your music. Saxophone quartet can be the most rewarding music-making you have during your studies as it focuses your attention on blend, intonation, group cohesiveness, and the shared formulation of an interpretation with friends and colleagues. However, it also likely requires that you practice on an instrument with which you're not as familiar as your primary saxophone. Thus, some suggestions for getting acquainted with your new instrument's tendencies are given at the outset. Doing some diligent individual work on making your quartet instrument as precisely practiced as your primary instrument will make for much more enjoyable rehearsals. The main areas of focus for the ensemble exercises are intonation, cueing, uniformity, and blend. Knowing how to properly adjust each note of a chord is an important skill to develop aurally, as is the skill of reading a score and quickly deciphering which member of the chord you're playing. As such, all exercises are written in full transposed score. Even if you are not yet familiar with transpositions, start with some of the "concert pitch" to saxophone pitch relationships you do know, and build from there while learning to read from a score. Since saxophone music requires that at some point, every member or occasionally the entire group cue together, cueing exercises focusing on developing this skill are included both individually and also in tandem with the aforementioned intonation exercises. Uniformity and Blend are the final areas and though frequently used interchangeably, they are specified here.

Improvisation is encouraged from an early stage and is given direction through the systematic study of scales and arpeggios and advice on ear-training and chord patterns. "John O'Neill has a solid understanding of jazz and how it can be taught. I highly recommend his educational jazz materials." (Lee Konitz, international jazz saxophone soloist) - includes 'classics' by Thelonious Monk, Charlie Parker, Sonny Rollins and Horace Silver - "...very good original jazz tunes that students will use as stepping stones for further development... a non-jazz-playing flute teacher would probably find the book a godsend especially if students are studying GCSE music." For years people have asked me to put what I showed them into a book. This book is my contribution to music education. This concept opens up many possibilities of phrasing that develop and flow easily. This concept was developed while living, playing and tutoring in New York City. Bebop licks, lines and phrases are still used in most of today's different forms of music. In this book you'll find licks and phrases you can use for Soul, Funk, Hip Hop Jazz, Cool Jazz, Smooth Jazz and easy Bebop tunes. This book uses words to help give jazz notation easy to remember sound qualities. Just as the famous "Cry me a river" jazz lick is used to teach a specific bebop lick, this book has many useful jazz licks. Basic Example, Notes = C D E G Numbers = 1 2 3 5 Easy to remember words, Words = "Play some be - bop" Numbers = 1 2 3 5 The above example uses the simple first 4 notes of the pentatonic scale to show the notes to words approach. This book uses many of the typical scales used in music. These scales become less simple and more musical in edited and inverted form. Most of the music we hear and play use the same scales and notes. It's usually the syncopation of the rhythm and arrangement of the notes that makes the different styles of music. This book has edited down the scales to the licks, lines and phrases used from BEBOP to FUNK, HIP HOP, NEW JACK SWING, COOL and SMOOTH JAZZ. Most of today's music still has a huge bebop influence, so first think simple bebop when reading the notes and words in this book. Once the sounds are in your ear, they'll come out naturally in other styles of music. Just follow the rhythm of the style of music you're playing. Listen to a drummer and follow his accents and you can usually play a variation of what you like to play. Written music is a good tool to show musicians the notes. Words are used to express the feeling of the music. Rhythm provides the groove and pulse of the music. Take time and try all of the examples in this book. Say the words and play the notes. Find the ones that flow freely from your instrument. This is not a technical struggle. Have fun. This book is my contribution to the "Wonderful world of jazz".
