The aim of this manual is to help readers get the best from their vehicle. It provides information on routine maintenance and servicing and the tasks are described and photographed in a step-by-step sequence so that even a novice can do the work. Whether you're interested in better performance on the road or extra horsepower to be a winner on the track, this book gives you the knowledge you need to get the most out of your engine and its turbocharger system. Find out what works and what doesn't, which turbo is right for your needs, and what type of set-up will give you that extra boost. Bell shows you how to select and install the right turbo, how to prep your engine, test the systems, and integrate a turbo with EFI or carbureted engine.

Based on 15 years of tire research, this book presents clear, non-academic explanations of how and why tires really work. Haney provides new insight into topics such as the complexity of rubber, how a pneumatic tire generates grip, and how to tune grip and balance using the load sensitivity of tires.

Building upon the international bestselling Toyota Way series of books by Jeffrey Liker, *The Toyota Way to Continuous Improvement* looks critically at lean deployments and identifies the root causes of why most of them fail. The book is organized into three major sections outlining: Why it is critical to go beyond implementing lean tools and, instead, build a culture of continuous improvement that connects operational excellence to business strategy Case studies from seven unique industries written from the perspective of the sensei (teacher) who led the lean transformation Lessons about transforming your own vision of an ideal organization into reality Section One: Using the Plan-Do-Check-Adjust (PDCA) methodology, Liker and Franz contrast true PDCA thinking to that of the popular, superficial approach of copying "lean solutions." They describe the importance of developing people and show how the Toyota Way principles support and drive continuous improvement. Explaining how lean systems and processes start with a purpose that provides a true north direction for all activities, they wrap up this section by examining the glaring differences between building a system of people, processes, and problem-solving that is truly lean versus that of simply trying to "lean out" a process. Section Two: This section brings together seven case studies as told by the sensei who led the transformation efforts. The companies range from traditional manufacturers, overhaul and maintenance of submarines, nuclear fuel rod production, health care providers, pathology labs, and product development. Each of these industries is different but the approaches used were remarkably similar. Section
